

Press Tension Lever to mount on saw or to move to next tooth. Release lever and slide backwards into tooth to sharpen.

Wear Pins rest on shoulder behind tooth. When worn, unscrew pin, remove one spacer to rotate to new surface.

Relocate pin for different style saws.

Adjust tooth pitch here.

Adjust "lead in, lead out" here.

Caution!! This is just a quick review. Be sure to read complete instructions before using this tool. Thank you for choosing a Jones Saw Grinder.
